📍 Chennai, India

Unity3D developer with 3+ years at HFG Entertainments — building reusable systems and shipping features across a live portfolio of 50+ mobile & PC games.

Education

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology <i>B.Tech in Electrical and Electronics Engineering — GPA: 8.1/10</i>	Chennai, IN <i>2018 – 2022</i>
Sri Krishna Swamy Matriculation Higher Secondary School <i>HSC (MBPC) — 72%</i>	Chennai, IN <i>2017 – 2018</i>
Annai Theresa Matriculation School <i>SSLC</i>	Chennai, IN <i>2015 – 2016</i>

Experience

Associate Programmer <i>HFG Entertainments Pvt. Ltd.</i>	Dec 2025 – Present <i>Chennai, India</i>
- Lead R&D and platform-level feature engineering, owning end-to-end architecture from design through cross-game integration. - Built a custom analytics pipeline capturing real-time player behaviour across the full 50+ game portfolio — no third-party SDKs. - Designed and shipped a proprietary in-game rating system deployed uniformly across all live titles. - Architect internal systems as reusable SDKs (ScriptableObjects, Object Pooling, MVC) for plug-and-play integration in new titles. - Manage GitHub repositories and coordinate code integration across a team of 10–20 developers.	
Junior Programmer <i>HFG Entertainments Pvt. Ltd.</i>	Jun 2024 – Mar 2026 <i>Chennai, India</i>
- Maintained and updated 50+ live games with regular patches, content updates, and bug fixes across Android, iOS, and Steam. - Handled build pipelines and store submissions for Google Play, App Store, and Steam simultaneously. - Integrated AdMob, Unity Ads, and Firebase (analytics, remote config, crash reporting) across multiple titles. - Implemented in-app purchase flows and rewarded ad systems.	
Trainee Programmer <i>HFG Entertainments Pvt. Ltd.</i>	Apr 2023 – May 2024 <i>Chennai, India</i>
- Onboarded into Unity3D game development workflows and company codebase standards. - Assisted in prototyping and validating new game mechanics before full portfolio rollout. - Collaborated with level designers and senior developers on feature implementation.	

Skills

Game Engines: Unity3D
Programming: C#
Mobile Platforms: Android, iOS
SDK Integration: AdMob, Unity Ads, Steam SDK, Firebase
Tools & Services: Git, Blender, Photopea
Architecture Patterns: MVC, Object Pooling, ScriptableObjects

Projects

- Escape Room: Echoes of Destiny** | *Unity3D · Android · iOS* | [Play Store](#) [App Store](#)

Company Project

 - An immersive escape room game with challenging puzzles and a gripping story; shipped on both Android and iOS.
- Escape Games: World vs Escapers** | *Unity3D · Android · Steam* | [Play Store](#) [Steam](#)

Company Project

 - Thrilling escape game with dark adventures and intense challenges; cross-platform release on Android and Steam.
- Escape Room: Mystery Legacy** | *Unity3D · iOS* | [App Store](#)

Company Project

 - A captivating mystery escape room adventure; unravel puzzles to reveal a hidden legacy.
- Sticky Bounce** | *Unity3D · Android* | [Play Store](#) [itch.io](#)

Personal Project

 - Physics-based arcade platformer — jump, stick to walls, and bounce through challenging levels; published on Play Store and itch.io.
- Other Personal Projects** | [CubeRoll](#) · [Capture It!](#) · [Deep Discoveries](#)

Personal Projects

 - CubeRoll: arcade game with cube movement and character unlocks. Capture It!: photography puzzle game. Deep Discoveries: relaxing underground exploration game.

Services

- R&D Feature Development:** Designed and built a proprietary in-game rating system and custom analytics pipeline integrated across 50+ live titles; architects mini-game frameworks using ScriptableObjects, Object Pooling, and MVC for cross-game reuse.
- Live Ops & Maintenance:** Maintains 50+ live games with regular patches, content updates, and bug fixes; manages GitHub repositories and coordinates integration across a 10–20 person team; handles build pipelines for Android, iOS, and Steam.
- SDK Integration:** Integrates AdMob and Unity Ads for in-game monetisation; sets up Firebase for analytics, remote config, and crash reporting; handles in-app purchases and rewarded ad flows; integrates platform SDKs for Play Store, App Store, and Steam.
- Systems Architecture:** Designs scalable, reusable systems using MVC, Object Pooling, and ScriptableObjects; prototypes and validates mechanics in isolation before rolling out to the full portfolio.
- Internal Tools & Platforms:** Builds internal SDK-style tooling for plug-and-play integration across new titles; drives confidentiality, performance, and zero-external-dependency design goals.

Languages Known

- English (Conversational Proficiency)
- Tamil (Fluent)
